Regarding: Renu Contracting and Restoration

It is with great pleasure I speak on behalf of the professional services of Renu Contracting and Restoration. Being enticed by the vibrant city nightlife at a young age, I only dreamt about one day being able to open my own restaurant/bar in Long Island that retained this edgy, charming and hip feel. With the revitalization of downtown Patchogue there was no better place to build my dreams. It was Renu Contracting and Restoration that constructed my dreams by implementing unique thought and creativity into every detail of the 5,100 square-foot restaurant. During the construction process I had difficulty finding the exact wood that I envisioned. Renu found a 10,000 square-foot barn in Pennsylvania that they purchased, knocked down, and milled to ensure the wood in Meetball Place would have the perfect rustic impression. Everything from the reclaimed NYC brick on the walls, to the industrial steel and wood front garage doors, to the detailed steel table tops, Renu was a contracting genius.

I would highly recommend Renu Contracting and Restoration. They have provided the resources and expertise to successfully meet every one of our needs while maintaining schedules and budgets. They truly understand what it takes to build relationships with their customers.

Sincerely,

Owner That Meetball Place
