SECURITY SPECIALISTS

Interior secured vestibules provide an added layer of security when faced with an intruder by delaying or preventing them from entering the building.

Typical door faces that have bullet resistant solutions with a simple, secure lockdown system ensures a safer environment without looking alarming.

Security planning and implementation is critical to keeping employees and visitors safe in a building. We make it easier by providing:

- Integration with other security components like access controls, door buzzers, transaction windows, cameras.
- Bullet Resistance Ratings Options
- Security Glazing Options
- Multiple Design Options
- We work with the top manufacturers in the industry
